

Plugged well?

AirShock™ it!

Most efficient well rehabilitation technology since 1997

AIRSHOCK™ uses bursts of compressed gas to restore well capacity, providing unparalleled efficiency in rehabilitation and development of all types of wells.

- ▣ Innovative approach, revolutionary in its simplicity and eco-friendliness
- ▣ Pays for itself during the first year and continues working for many years with very little maintenance
- ▣ Safe, environmentally friendly
- ▣ Highly effective for both screened and open wells
- ▣ Time-saving
- ▣ Used independently or in combination with chemicals
- ▣ Reliable equipment with negligible maintenance through years
- ▣ Contractor-owned without royalties
